Profile

Reliable site electrician with **seven years on commercial fit outs**, refurbishments and small industrial units. Recently qualified as an **agricultural drone operator**, covering survey flights and spraying. Known for turning up prepared, keeping a tidy job and finishing on time.

Employment

Site Electrician 2019 to present

Rowland Building Services, Manchester

- Installed conduit, trunking and containment on commercial fit outs of up to forty units.
- Pulled and terminated cables for lighting, power and small machinery.
- Tested circuits before energising and recorded the results for the handover pack.
- Traced and repaired faults on lighting and power circuits, often on occupied sites.
- Worked to the wiring regulations and site safety rules on every job.
- Brought two apprentices through their first year on the tools.

Maintenance Electrician 2016 to 2019

Halewood Facilities, Leeds

- Carried out planned maintenance across six sites and kept clear records of every visit.
- Answered breakdown calls and got equipment running again with the minimum of downtime.
- Serviced tools, plant and machinery to the schedule set by the maker.
- Fitted sockets, switches, light fittings and distribution boards.
- Ordered parts and kept a small van stock of the items used most.

Education

Level 3 Diploma in Electrical Installation 2012 to 2014

Manchester College

- Completed the full route from first fix through to inspection and testing.
- Studied **wiring regulations, cable calculations and fault finding** alongside site work.

Achievements

- Passed the eighteenth edition wiring regulations first time, alongside full time work.
- Completed a two month agricultural drone course covering flight control, spraying and safety.
- Cut callout times on the maintenance round by planning van stock around the six sites.
- Kept a clean safety record across seven years on commercial and occupied sites.
